Gentlemen:

FYI. In the e-mail below, Mr. Krueger provides information on the presence of a possible public water supply system in the vicinity of the proposed Goliad Project.

Subject Church and PWS

Mr. Torres,

It has come to my attention that in relation to UIC Permit Application number UR03075, the proposed aquifer exemption is within vicinity of a potential public water system:

St. Peter's Lutheran Church
1545 E. FM 1961
Goliad, Texas 77963
(361) 645-2922

According to the Pastor of this Church, the average attendance in 2007 was 54 total persons per Sunday, totaling 2,808 persons.

SWDA states that "All **public water systems** must have at least 15 service connections or serve at least 25 people per day for 60 days of the year", totaling 1,500 persons.

It appears that this Church's water system may qualify for PWS and fall under EPA Federal jurisdiction. Since there are only 52 Sundays in a year, it may need to be shown that the Church was available to or inhabited by 25 or more persons for eight (8) additional days during the year, other than Sunday services.

Thank you for your consideration.

Mark Krueger
